## UNTREATED TIMBER FULLY ENCASED IN RE-CYCLED PLASTIC

- The **WOODSHIELD** post is a chemical free timber post fully encased in recycled polymer joining the best of both worlds, the rigidity and strength of wood, with the toughness & resilience of plastic
- Standard fasteners can be used. "Ram" or "Knock" them in the ground
- NO rot, NO rust, NO termite/white ant issues, NO chemical issues,
- Easy to handle, NO splinters, NO cracks, NO painting
- Environmentally friendly, sustainable, recyclable, a product from the circular economy since 2004
- Safe for animals and can be installed in and around water including saltwater.
- Certified organically approved across Australia & New Zealand

## AQUACULTURE

**WOODSHIELD** timber posts have been specifically created for use in the Viticulture, Aquaculture, Equine and general Agricultural industries. Being fully coated in polymer ensures the timber posts are more resilient to harsh climatic conditions and pests alike while displaying exceptional resistance to bending, cracking, snapping and splitting.

Melbourne Testing Services '3 Point Bending Tests' confirm **WOODSHIELD** timber posts achieve a breaking force 40 to 50% greater than treated pine posts and the breakage deflection angle is a staggering 100% higher.
